WHY CHOOSE STELLAR ?

Stellar Information Systems Limited is the first company in India to introduce professional data recovery services in the year 1993. Since then there is no looking back and have equipped ourself with the best in-class capabilities and practices. Today we are capable of recovering data from virtually any kind of data loss situation, from logical media crashes caused primarily due to Accidental formatting of hard disk, Invalid Drive & disk specification, Accidental Deletion of Data even from Recycle bin / Sabotage, Data Lost due to a virus attack, Missing File/Directory Or Accidental re-partitioning to physical media crashes caused due to mal-function of Read/Write Head assemblies and PCB/Logic Board failures.

Equipped with country's ONLY state of the art CLASS 100 CLEAN ROOM, Stellar's indigenously developed technology of Head Transplant ensures maximum recovery success rate irrespective of the cause of failure. Today we are confident of giving our customers up-to 100% Recovery success rate

Stellar's R&D wing, working towards innovation in recovery technologies has been successful in devising tools capable of recovering data from most of the reported service area / Firmware problems

Stellar, today is country's first data recovery company to have indigenously designed tools for Single/Multiple Platter transplantation required in case of spindle motor problems
